Macomb County Communication Systems Experts Team With Local Recycling Firm

(March 5, 2009-) Effective Feb 17, 2009 federal law mandates the recycling many styles of electronic and computer based equipment. Complete Communication Inc. (CCI), a leading low voltage communication systems provider, announced that it has entered into a long-term partnership with Green Remediation Services, of Harrison Township, MI.

Green Remediation Services will handle "out of service" electronic equipment de-installation, removal and recycling needs for CCI clients. Green Remediation Services specializes in the removal and recycling of: telephone systems, sound systems, audio visual equipment, networking equipment, POS and bar code systems, servers, UPS and power conditioning, and abandon cable systems.

CCI President, Michael Meldrum says "Our partnership with Green Remediation Services has been great. They offer nationwide remediation and recycling which allows us to expand our services. When companies either expand or contract they need CCI, this is where CCI and Green are similar".

In 2008, the companies successfully executed the first of many large scale system remediation projects – one for L'Anse Creuse Public Schools, in Michigan, and the second project was completed at First Midwest Bank, in Illinois. The combined system remediation effort for both projects involved de-installation of telephone system equipment at more than 120 facilities.

As a result, CCI and Green Remediation Services ensured that an estimated 10,000 lbs of electronic equipment was effectively recycled, and did not end up in a local landfill. An additional side-benefit to the recycling effort was that it also helped a number of charities including Care House of Macomb County, Selfridge Family Help Plan, Wounded Warrior Program and Shriner's Hospital for Children.

In 2009, Complete Communications Inc., looks forward to leveraging their partnership with Green Remediation Services, to the benefit of their collective clients, as well as continuing to help many charitable organizations and simultaneously support local governmental green initiatives through the recycling effort.

Founded in 1987, Complete Communications, Inc. (CCI), is a recognized leader in the communications arena, providing full service tailor-made solutions to its customers throughout Michigan. CCI is unique, in the fact that they offer their customers a "single source"/one-stop-shop capability for all their communication needs. Fundamental to the company's success is its ability to implement projects and maintenance solutions that consistently exceed customer expectations.
